Accessories

Arctic Pure Plus

Premium Ice Machine Water Filtration system

Ultra fine filtration (0.5 microns) with silver impregnated carbon block and slowly soluble polyphosphates provides triple protection from harmful contaminants that can affect your ice and machine's performance. Certified to NSF standards 42 and 53 by IAPO and meets CUPC requirements. The Pre-filter system is recommended for all applications to achieve maximum filtration efficiency and cartridge life.

K00462 Secure Fastening Kit Flanged Leg and Bracket Kit

Securely fast the Indigo NXT ice machine head to the pre-drilled inserts on the back of the D-bin series. Stainless steel flanged feet attach to bin and can be screwed to the floor.

K00511 & K00485 Merchandiser Retail Display Merchandisers

Sanitation Station Approved: Mult-Mount External Scoop Holder, Metal Scoop and Powder Chemical Merchandiser. Cardboard Merchandiser only "Sanitation Station" for retail display of sanitation products.

Liquid Descaler & Sanitizer Liquid

Manitowoc Ice Machine Cleaner/Descaler and Sanitizer are the only products approved for use in Manitowoc ice machines. Ice machine cleaner/descaler is used to remove lime scale and mineral deposits. Ice machine sanitizer disinfects and removes algae and slime.

K00376 and K00516 Drain Pump

K00376: SM-50 Drain pump accessory for use when a floor drain is not available.

K00516: USE0050A (CrystalCraft Premier) Drain pump accessory for use when a floor drain is not available.

K00497 and K00523 Touchless Lever kits

Update your current Hotel Dispenser to Touchless!

When using the Manitowoc Touchless Lever Activated Chute users are presented with improved sanitation. The lever eliminates the need to touch a hand to the machine to dispense ice. The receptacle is responsible for assisting in dispensing the ice.

LuminIce II Virus and Bacteria Inhibitor Sanitation Solution

LuminIce is an advanced sanitation device which defends against viruses, bacteria, mold and yeast using chemical-free ultraviolet light technology. The device creates "active air" by circulating air inside the ice machine food zone over a sterilizing UV light. As this treated air passes over exposed food zone components it inhibits the growth of viruses, bacteria, yeast and other common microorganisms. The benefits of the device include improved sanitation, performance, and a better bottom line. Treating the air for viruses, bacteria and microorganisms results in a machine that stays clean longer. This means less labor and downtime during scheduled cleanings. Clean machines also perform better, producing ice efficiently and with less strain on machine components. A small investment in LuminIce improves your bottom line though fewer professional cleanings and less downtime to complete them. Whether your operation is a challenging environment, such as a bar or pizza parlor, or if sanitation is top of mind, there's no better way to defend against viruses and bacteria in your ice machine than with LuminIce® II.

LuminIce Bulb Replacements

K00454, K00528 & K00425 LuminIce Bulb Replacements

LuminIce® Replacement Bulbs:

NOTE: Bulbs are not interchangeable between LuminIce® versions.

iAuCS®

Automatic Cleaning System

An efficient, dependable, and affordable accessory that schedules and preforms routine ice machine cleaning automatically.

The innovative AuCS accessory virtually eliminates the need to have a service technician preform manual cleaning procedures on the water distribution system of your Manitowoc ice machine. It is a known fact that regularly scheduled preventative maintenance (cleaning) reduces the total operating cost of any ice machine. With AuCS, you simply select the monthly cleaning frequency through the Indigo display (1, 2, 3, 4, 5, or 6 months) and AuCS does the rest...automatically. AuCS is also affordable, as the entire system costs less than the expense of 3 manual cleanings. AuCS is designed for use with Manitowoc Indigo and Indigo NXT Series ice machines.

	Powder Descaler & Rinse Powder Descaler and Rinse for cuber machines (Americas Market) Manitowoc Ice Machine Powder Cleaner/Descaler and Rinse are the only products approved for use in Manitowoc ice machines. Ice machine Cleaner/Descaler is used to remove lime scale and mineral deposits. Ice machine Rinse removes algae and slime.
	Top Air Discharge Kit Top Air Discharge Kit Top Air Discharge Kit transfers air discharge from the sides of the ice machine to the top by having the louvered side panel on the top of the machine rather than the sides. This is ideal for locations where space on the sides of the ice machine is limited. Top Air Discharge kit is available for Indigo Series 322,522,450,500,606,906,1106, and 1200.
	Multi-Mount External Scoop Holder The multi-mount external scoop holder improves overall sanitation. With the addition of the holder, it makes daily operations much quicker and easier. Keep your scoop protected and never lose your scoop AGAIN!
	K00463 - Metal Scoop When using the Manitowoc metal scoop, users are presented with improved sanitation and an ergonomic grip when scooping ice. With the lifetime warranty offered, it'll be the last ice scoop you'll ever have to buy!
	Ice Bagger K-00146 Easy to use ice bagging attachment ideal for convenience store, supermarket, recreation and campground bagged ice production
	CleanAir Pack Slime Inhibitor Slime is a leading cause of ice machine breakdowns and biological growth is a health concern. Manitowoc's exclusive CleanAir Pack Accessory releases chlorine dioxide on a controlled basis to inhibit the growth of bacteria and fungi that form slime and cause odors in the food zone of ice machines. It is not uncommon to perform a monthly manual cleaning of an ice machine to remove slime.
	CNF Stand For CNF 201 or 2020 The CNF Stand provides another option when there is no counter space available for a CNF 201 or 202.
